

## FedEx Ship Manager® Server v18.0.8 Software Fixes

FedExShip ManagerServerv18.0.8 contains resolution to multiple software issues.

Following table lists known issues that have been corrected.

	Software Fixes in v18.0.8	Defect ID
1	You can now edit/close an existing open shipment without encountering the "Openship index not found" error.	517090
2	When shipping U.S. Express shipments to Brazil zip codes which are not served, the software now displays a valid error message instead of printing out labels without barcodes.	517103
3	The Digital Signatures tab is now displayed in the properties window that appears when the user right-clicks on FedexShipManagerServer.exe file. The installation details of the 1807 build are displayed here.	510624
4	During installation, clicking the Back button does not terminate the installation process. You will be navigated to the previous window of installation.	511452
5	The Ground/Home Delivery shipment now creates valid label and barcode when Legacy Ground is selected as barcode setting.	517141
